Bachelor's Degree in Faculty of Science
with a major in Information Technology

EDUCATION

Kasetsart University, Sriracha Campus
◦ GPA: 2.88

CHONBURI, THAILAND
Graduated in Mar 2024

WORK EXPERIENCE

Back-End Developer (Trainee), Formation One Co., Ltd

Nov 2023 - Mar 2025

- Database design
- Create a backend system to connect with the frontend.
- Developed in MVC format
- Developed the system using Netbeans 8.2.
- Learn how to deploy a website using Docker on a Tomcat server
- Using Mssql server database, Java

PROJECTS

Windows Application KU FAIR | C#

Aug 2022

Tech: C#, .NET Framework, MS SQL Server

- Developed a desktop application to manage CRUD login system for event use.
- Designed the full database schema and UI flow.
- Responsible for full-stack implementation and testing.

Mobile Application U Routine | Flutter

Oct 2023

Tech: Dart, Flutter, Firebase, Google Maps API

- Developed a daily routine management app with login, reminders, and map features.
- Implemented user authentication with Firebase Auth.
- Integrated Google Maps to show real-time location.

PROJECTS

Mobile Application Activity_Management | Flutter

Oct 2023

Tech: Dart, Flutter, Firebase

- Develop the system according to the design
- Implemented user authentication with Firebase Auth.
- Design the database according to the specified requirements
- There is a login and registration system connected to the Firebase database, a menu displaying each user's class schedule (CRUD), and a note-taking menu (CRUD)

Web Application Ecommerce_Project

Nov 2024

Tech: ReactJs, NodeJs, Express, Prisma, Mysql

- Developed the system using ReactJs for the Frontend, connecting to the Backend's API.
- Implemented Login, Register, Cart, Product, and Stripe systems.
- Created an Admin page to manage the backend system, such as updating product statuses, uploading products, and managing users.
- Developed the Backend system using NodeJs, ExpressJs, and used ORM Prisma for connecting to the Mysql database, with JWT API middleware for validation.

Windows Application ManageProductApp | C#.Net 8

May 2025

Tech: C#, .Net core Api

- Build a backend system using the MVC pattern.
- There is a CRUD system.
- Make the backend system an API.

SKILLS

Languages

- Thai
- English (basic)

Programming Language

- C#
- Java
- Html, Css, Js
- NodeJs, ReactJs

Database

- Relational Database : PostgreSQL, MySql, Ms sql server
- No Relational Database: MongoDB, Firebase
- ORM : Prisma

Others

- Docker
- Postman
- Git
